Hungund, Bagalkot, Karanataka, India.

Technical Skills:

- **Programming Languages:** C, C++, Python, Java, JavaScript
- **Web Technologies:** HTML5, CSS3
- **Frameworks & Libraries:** Django, Flask, OpenCV, Streamlit
- **Databases:** MySQL, MongoDB
- **Software Testing & Automation:** Selenium WebDriver (Python)
- **Version Control Systems:** Git, GitHub
- **Computer Science Fundamentals:** DBMS, Computer Networks
- **Developer Tools:** VS Code, PyCharm, Jupyter Notebook, Cursor
- **APIs:** REST API integration
- **AI Tools & Productivity:** Practical experience using AI tools for development, testing, debugging, and documentation

Education:

- **Master of Computer Applications (MCA)**
Presidency University, Bangalore
Year of Graduation: 2027
CGPA:
- **Bachelor of Computer Applications (BCA)**
ARJ BCA College, Ilkal (Affiliated to Rani Channamma University, Belagavi)
Year of Graduation: 2025
CGPA: 8.76/10.
- **Class XII-Science (PCMCS)**
Shri Guru Chaitanya PU College, Ilkal
Year:2022
Percentage:88%

Profile:

Technically driven MCA student applying **Python and web development skills** through academic projects and internship experience. Experienced in building database-driven web applications using Django, HTML, CSS, and MySQL, and actively exploring **entry-level software roles and internship opportunities** in the IT domain.

Projects:

1. Personal Portfolio Website

Technologies used: HTML, CSS, JavaScript

- Designed and developed a responsive personal portfolio website to showcase the prospects and skills.
- Integrated contact forms, animations, and the smooth scrolling.

2. CareerCompass

Technologies used: Django, HTML, CSS, JavaScript, MySQL

- Developed a full-stack career guidance web application to help users explore job opportunities and manage applications.
- Implemented user authentication, job listings, application tracking, and profile management features.
- Designed a clean and responsive interface using HTML and CSS and handled backend operations using Django and MySQL.

3. Face Emotion Detection System

- Developed a Face Emotion Detection system using Python, OpenCV, and Deep Learning.
- Implemented face detection using Haar Cascade and emotion recognition using a CNN model.
- Built a Flask-based web application to display emotion prediction results.
- Worked with image preprocessing, model integration, and web-based user interaction.

4. ShravyaAI – Intelligent Audio Processing System

Python | Streamlit | Audio Processing | Machine Learning

- Developed a **real-time audio processing system** supporting file and YouTube inputs with Python and Streamlit.
- Implemented **speech-to-text (English & Kannada), emotion & sentiment analysis, and keyword extraction.**
- Built an **AI-based question answering module** using TF-IDF and similarity matching (Scikit-learn).
- Presented insights through **interactive visualizations** and automatic audio summarization.

Internship:

Python Full-Stack Web Development Intern
SyllIX | Feb 2025 – Apr 2025

- Learned Python from basics to advanced concepts
- Worked on Django framework for backend web development
- Gained hands-on experience in backend development and database
- Developed practical understanding of full-stack application workflow
