Objective

Motivated Master of Computer Applications (MCA) student with hands-on experience in **Python, Java, full-stack web development, AI/ML, and RESTful application development**. Experienced in designing and developing scalable web applications, integrating databases, and building AI-powered solutions through academic projects and internship experience. Strong understanding of **Object-Oriented Programming, Database Management Systems, REST APIs, and Software Development Life Cycle (SDLC)**. Passionate about developing efficient, reusable, and reliable software while continuously learning modern technologies and collaborating within development teams.

Education

Qualification	School/College	Year	Percentage
Master of Computer Application (MCA)	Presidency University, Bangalore	2025-2027	Ongoing
Bachelor of Computer Application (BCA)	ARJ BCA College, Ilkal (Affiliated to Rani Channamma University, Belagavi)	2022-2025	9 CGPA
PCU-Science (PCMCS)	Shri Guru Chaitanya PU College, Ilkal	2020-2022	88%

Technical Skills

- Programming languages:** C, C++, Java, Python, JavaScript
- Frameworks:** Django, Flask, Spring Boot
- Web Technologies:** HTML, CSS3, REST APIs
- Database:** MySQL, MongoDB
- AI / Machine Learning:** Model Training & Evaluation, NumPy, Pandas, Matplotlib, Scikit-learn, TensorFlow
- Version control tools:** Git, GitHub
- Development tools:** VS Code, Google Colab, Eclipse, Cursor, Kiro
- Computer Fundamentals:** Object-Oriented Programming (OOP), Data Structures & Algorithms, CRUD Operations, MVC/MTV Architecture, Authentication & Authorization

Internship

Python Full-Stack Web Development Intern

SkyllX | February 2025 – April 2025

- Built full-stack web applications using **Python, HTML, CSS, JavaScript, and MySQL**, implementing CRUD operations and database connectivity.
- Strengthened backend development skills by developing responsive web applications and applying core Python programming concepts in real-world projects.

Projects

1. CareerCompass – Job Portal & Recruitment Management System

Technologies: Python | Django | MySQL | HTML | CSS | JavaScript | Django Authentication

- Developed a full-stack job portal enabling job seekers to create profiles, upload resumes, search jobs, and track application status.
- Designed and integrated a MySQL database to manage users, company profiles, job postings, and applications using Django's MTV architecture.
- Implemented secure authentication, file uploads, and CRUD operations for job postings, profile management, and application tracking.

2. AI Job-Aware Resume Analyzer

Technologies: Java | Spring Boot | React | MySQL | Spring Security | JWT | Spring Data JPA | Hibernate | REST APIs | Apache Tika

- Developed a full-stack AI-powered resume analysis platform using Spring Boot, React, and MySQL to compare resumes with job descriptions and generate ATS-based insights.
- Implemented JWT authentication, secure REST APIs, and Apache Tika for PDF/DOCX text extraction and resume processing.
- Built a resume analysis engine for keyword matching, ATS scoring, skill gap detection, and personalized learning recommendations.

3. Real-Time Face Emotion Detection System

Technologies: Python | Flask | OpenCV | TensorFlow/Keras | Flask-SocketIO | NumPy | HTML | CSS | JavaScript

- Developed a real-time facial emotion detection application using Flask, OpenCV, and TensorFlow/Keras for live emotion recognition.
- Integrated Flask-SocketIO and WebSockets to stream webcam video and display real-time emotion predictions on an interactive dashboard.
- Implemented REST APIs and modular backend architecture for video streaming, emotion detection, and image capture.

4. StudentFlow – Student Personal Finance Tracker

Technologies: Python | Flask | MongoDB | HTML | CSS | JavaScript | REST APIs

- Developed a full-stack student finance management application using Flask and MongoDB to track expenses, manage budgets, and monitor spending patterns.
- Implemented secure authentication, session management, and RESTful APIs for transaction management, financial analytics, and Excel report generation.
- Designed a responsive dashboard with expense categorization, budget tracking, spending insights, and monthly financial summaries.

Certificates

- Introduction to Prompt Engineering for Generative AI – LinkedIn Learning**
Gained foundational knowledge of designing effective prompts for AI models and understanding practical use cases of Generative AI.
- Python Programming – Reliance Foundation Skilling Academy**
Developed a strong foundation in Python programming, including core concepts, logic building, and basic problem-solving techniques.
- Full Stack Development – Udemy**
Acquired hands-on exposure to front-end and back-end development concepts, including building responsive web applications.
- Office Automation Tools – Karnataka School Examination and Assessment Board**
Trained in productivity tools for documentation, data handling, and professional reporting.
